- 10 Year Warranty

**EverLast  
Outdoor Area Light**

## Peak Performance

In 2022, PicklePlex in Punta Gorda was hit by Hurricane IAN, wiping out all 54 of their existing lights. With a PPA tournament upcoming in their 2023 season, PicklePlex needed quality lights, and quickly. In reviewing the needs for the courts, PicklePlex decided to go with 72 of EverLast's 300w Outdoor Area Lights to better accommodate nighttime play. The court areas were mapped out to find the prime locations of the fixtures to meet the footcandles needed for PPA tournaments. As soon as the fixtures were ordered, EverLast had these fixtures professionally powder-coated to match the PicklePlex brand. Upon completion, the fixtures were quality tested and shipped out quickly for an on-time installation. PicklePlex was back in business and able to quickly host nighttime tournaments in no time!

A major contributor to the recovery effort (after Hurricane IAN in Sept 2022) was Trowbridge Energy Group (EverLast Lighting), who responded quickly to our needs. Seventy-two replacement light fixtures and accessories were ordered within 3 weeks after the hurricane event...The quality of the product, including a 10-year warranty, and its unit cost is unmatched in the industry. Working with Trowbridge Energy Group (EverLast Lighting) was seamless, with great communication throughout the process. Not only did they play a key role with the efficient recovery of the PicklePlex, but the lighting is much improved. Great team effort!
